These are the three webpages which I have developed

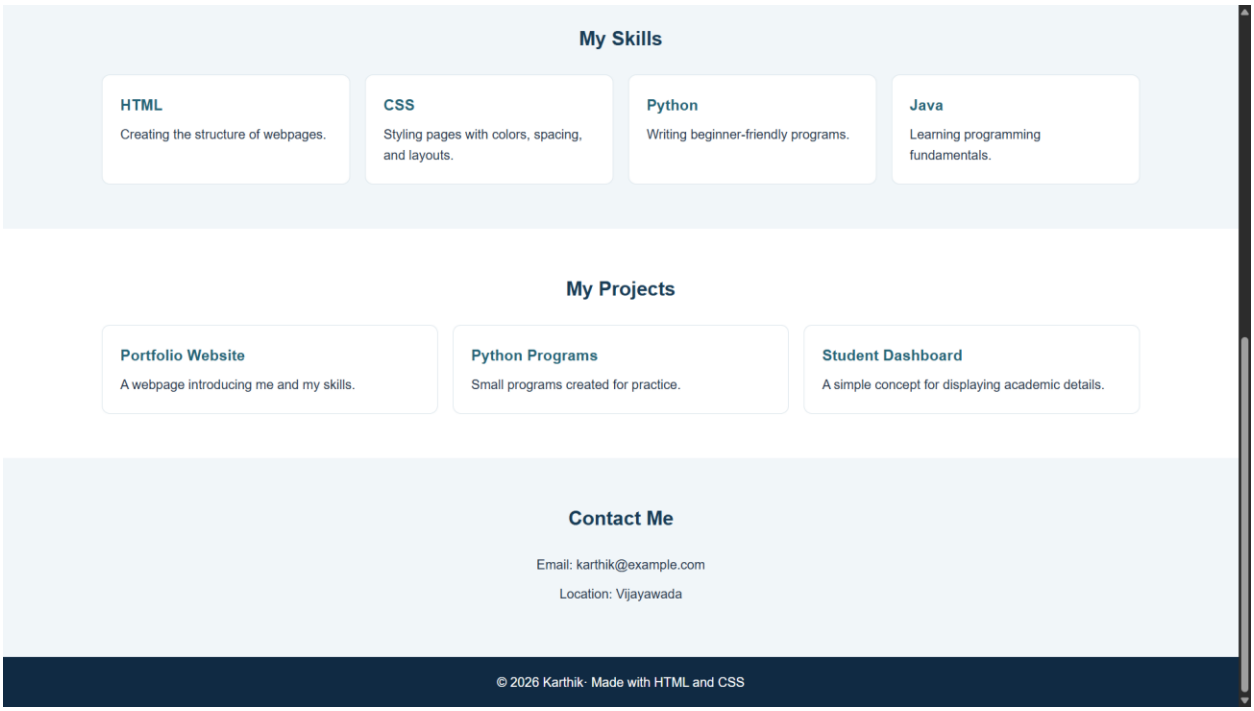

Webpage 1(number1)

1. aim: Personal Portfolio Website

2. objectives: Create a personal website displaying a profile, educational qualifications, technical skills, hobbies, projects, achievements, resume, and contact information. Use CSS animations, responsive layouts, and interactive navigation effects.

3. screenshots:

Webpage 2(number2)

1. aim: College Information and Admissions Website

2. objectives: Design a college website displaying institutional information, departments, courses, faculty profiles, admissions procedures, campus facilities, events, and contact details. Create a navigation bar, banner, and responsive information cards.

CampusConnect

About Courses Facilities Admissions

LEARN · GROW · LEAD

Build Your Future With Us

A welcoming learning environment for curious minds, practical skills, and bright ideas.

Explore Admissions

Welcome to Our College

We aim to support students through quality teaching, practical learning, teamwork, and activities that prepare them for the future.

Popular Departments

Computer Science

Programming, software development, and computing fundamentals.

AI & Machine Learning

Learning how data and intelligent systems can solve problems.

Electrical Engineering

Exploring electrical systems, circuits, and technology.

Campus Facilities

Modern Labs

Practice concepts through guided laboratory sessions.

Library

Find books and study resources for independent learning.

Student Clubs

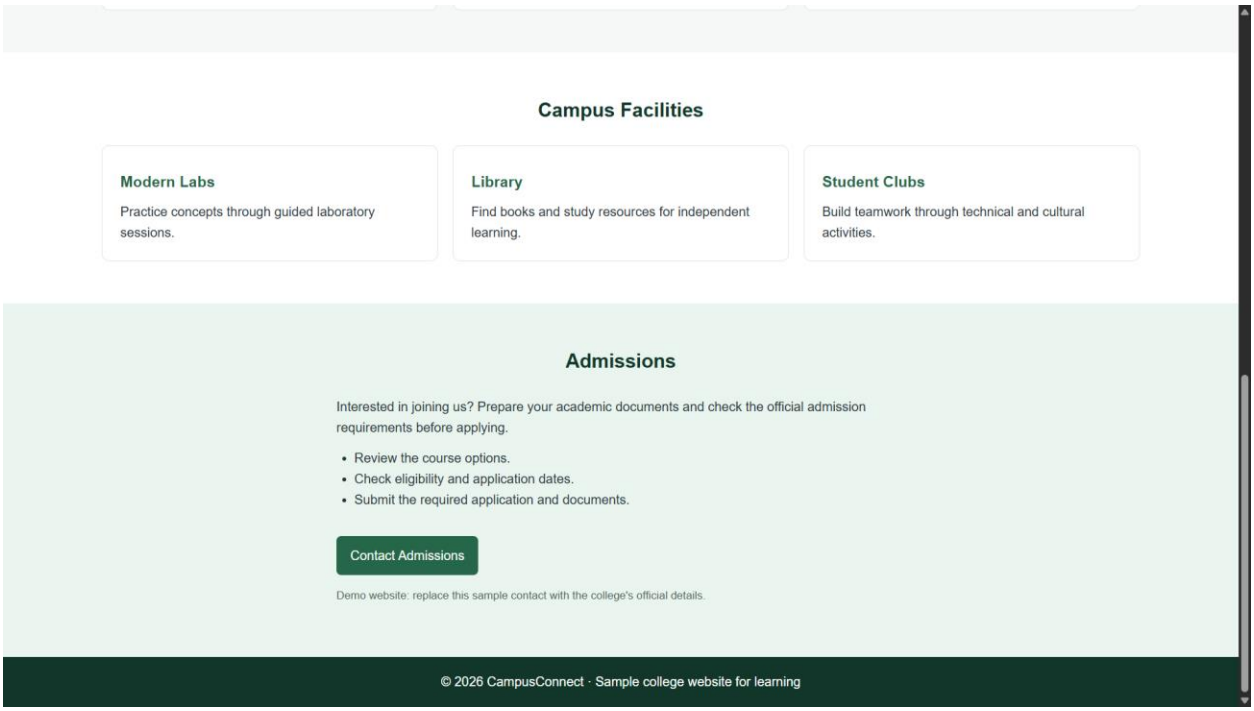

Build teamwork through technical and cultural activities.

Admissions

Interested in joining us? Prepare your academic documents and check the official admission requirements before applying.

- Review the course options.
- Check eligibility and application dates.
- Submit the required application and documents.

Contact Admissions

Webpage 3(number3)

1. aim: Online Learning Platform Interface

2. objectives: Develop an e-learning website containing course categories, video lesson thumbnails, instructor profiles, course descriptions, learning objectives, and enrollment buttons. Design responsive course cards and progress indicators.

3. screenshots:

LEARN SOMETHING NEW

Small Lessons. Big Possibilities.

Build useful skills at your own pace with beginner-friendly courses in technology and creativity.

Why Learn With SkillSpring?

Clear Lessons

Simple explanations that build one concept at a time.

Learn at Your Pace

Study when you have time and revisit topics as needed.

Practice First

Try small activities to strengthen your understanding.

Start Learning Today

Pick a course and begin building your skills one lesson at a time.

Ask About Courses

Demo interface only. Course links use sample email addresses; no enrollment system is connected.
